

Did your CONCLUSION get all of your HARES?

H is for Hypothesis

In your first sentence, restate the hypothesis and declare whether or not it was proved or disproved. If you want to write a second sentence, go for it! (Optional)

A is for Analysis

In 1-3 sentences do the following:

In your first sentence write, "The data my team collected showed that _____."
Analyze the data—explain any trends and patterns; OR write what you learned from the data.

R is for Research

In 1-3 sentences state how what you learned from your background research helped you better understand your results. "My research showed that _____."

E is for Error

Write the following: "Some possible sources of error were _____."
Write as many sentences as there are sources of error (e.g., 3 sources of error = 3 complete sentences).

S is for Society

How does what you learned from this lab activity benefit society as a whole? (Optional)
